**Mission Director**  
**National Rural Health Mission, Haryana**

D.O. No. MD/NRHM/89

Dated : 28/8/11

**Subject: Declaration of Year 2012-13 as a year of "Intensification of Routine Immunization"**

Vaccination is one of the main strategies for averting both morbidity and mortality. As per DLHS-III, the full immunization coverage of the State is standing sub-optimal at 59.06%. There are some districts where full immunization coverage is very less. While there are many pockets where immunization coverage is high. The state still has huge scope to achieve our target of more than 95% full immunization coverage. The district-wise immunization coverage is enclosed herewith.

Haryana State is committed to decrease the morbidity and mortality caused by diseases, which can be prevented by vaccination. The State has taken many initiatives to ensure high quality and equitable accessibility of immunization services to most underserved population, identification of high risk pockets (slums, bricklins, migrants) with low immunization coverage.

Therefore, this year also, all our efforts will be made to improve full immunization throughout the Haryana State. In order to give special attention it has been decided to declare the financial year 2012-13 as "YEAR OF INTENSIFICATION OF ROUTINE IMMUNIZATION" (copy attached). You are requested to put on your efforts to improve the full immunization coverage.

I look forward to your valuable support.

Yours sincerely,

(Dr. Rakesh Gupta)

Sh. \_\_\_\_\_, IAS,  
All Deputy Commissioner,  
Haryana State.
